	v. Central Examination Facility , Number of rooms and capacity of each	D. J. Sanghvi College of Engineering (DJSCE), SVKM, is supported by a centralized, technology-enabled examination infrastructure to support the end-to-end conduct, processing, evaluation and declaration of examinations. The facility brings together critical examination functions under one coordinated framework, ensuring confidentiality, efficiency, security, transparency, and timely declaration of results. The facility comprises: 1. Question Bank Management System (QBMS) – A secure digital platform for the creation, review, storage, management and controlled generation of question papers. The QBMS significantly reduces manual intervention and enhances the security, confidentiality, and quality assurance of question-paper preparation. The system facilitates: Creation and submission of question papers by authorised faculty/examiners. Mapping of questions to course outcomes, units, topics, difficulty levels and cognitive levels, wherever applicable. Multiple question paper sets and controlled paper generation. Digital review and approval of question papers. Secure storage of question banks. Role-based access and authentication for users- template creators, authors, and reviewers. Automated/randomised selection of questions based on predefined parameters. Controlled printing/download and transmission of final question papers. 2. Scanning and Digital Evaluation Centre – Digitization of answer books through scanning and secure digital evaluation by authorised examiners, with provisions for moderation, revaluation and digital record management. This facility reduces the physical movement of answer books, strengthens confidentiality, facilitates monitoring of evaluation, faster and more transparent evaluation and result processing. This includes: Digitisation of physical answer books while preserving the integrity and sequence of the original scripts. QR-code based identification of answer books. Secure indexing and storage of scanned answer books. Digital distribution of answer scripts to authorised evaluators. Digital marking/evaluation of answer books through a

		secure evaluation platform. Allocation of answer scripts to respective examiners based on subject expertise Recording of marks and evaluator remarks directly within the digital evaluation system. Provision for moderation and revaluation of answer books. Automated transfer of evaluation marks to the Result Processing system. Secure archival and retrieval of digitally evaluated answer books for examination records and grievance-redressal requirements. 3. Result Processing– Centralised processing, verification and consolidation of examination results, including marks, grades, credits, SGPA/CGPA and generation of examination reports. This includes: Secure receipt and consolidation of internal, practical, term-end and end-semester assessment data. Automated processing of marks, grades, credits, SGPA/CGPA and other academic parameters as prescribed by the respective academic regulations. Application of approved examination rules relating to passing standards, grace marks, re-examination and other academic requirements. Generation and verification of result sheets, grade cards, marksheets and other examination-related reports. Data validation and multiple-level scrutiny before declaration of results. Integration with the student information/ERP system for seamless transfer of approved results. Generation of management information reports and statistical analysis of examination performance. Maintenance of secure digital records and examination history of students. Total Rooms 27 and Sitting Capacity per rooms 33
	vi. Online Examination facility (Number of Nodes, Internet band width etc.)	The institute has a robust and scalable campus-wide wired and wireless network infrastructure supporting academic, administrative, research, and student-centric digital activities. The campus network has an overall bandwidth availability of more than 2 Gbps, ensuring high-speed connectivity across various academic and administrative areas. Internet connectivity is provided through a 500 Mbps Internet Leased Line (ILL). As per observed network performance measurements, the Internet connection provides approximately 150 Mbps upload speed and 50 Mbps download speed under the prevailing network conditions; these values represent measured/observed performance and not the subscribed ILL bandwidth. The network infrastructure comprises 1,300 desktops, 17 laptops, 45 network switches, 40 wireless access points, and dedicated server infrastructure, supported by a Fortinet firewall for secure and controlled network access. The wired and wireless network enables seamless access to institutional ERP/LMS platforms, online learning resources, digital libraries, research databases, cloud-based applications,

		video conferencing platforms, and other academic and administrative services. The infrastructure provides reliable, secure, and scalable connectivity to faculty, students, and staff and supports the institute's growing requirements for digital teaching-learning, research, collaboration, and administrative activities.
