

Academic Year 2018-19

1	Network Traffic Identification using Deep Learning
2	Autonomous Tagging of Text Data using Machine Learning
3	Heart Disease Predictor
4	Design and Implementation of Intrusion Detection System in the Network using Machine Learning Approach.
5	Design and Implementation of Library Shelf Management System using Machine Learning and Internet of Things
6	Detecting and Adapting to Concept Drift for Improving Classification in Imbalanced Datastreams
7	SSL Based Classification for Imbalanced Data Streams
8	Smart Expense Management System
9	Music Synthesis
10	Robust Intrusion Detection System under Adversarial Drift
11	Student Intellect Assessment using Deep Learning
12	Simultaneous 2D and 3D pose estimation and action recognition
13	Automated Question Generation and Answer Verification for Visual Data
14	Trajectory Enrichment for Incremental Location Prediction
15	User Mobility Behavior Analysis Using Movement Data
16	India's Crime Prediction Model
17	3D Layout Generation of a Room from 2D Images
18	DRISE: Diabetic Retinopathy Identification and Severity Evaluation
19	Optimization of Taxi Revenue
20	AI Judge : An Intelligent Justice System
21	InspiroBot
22	Generating Photo Realistic Image from Given Text Description
23	Identifying Involvement of People in Legal Matters using Artificial Intelligence.
24	Semantic Question Pairing using Deep Learning.
25	Mastering Atari Games using Reinforcement Learning
26	Answering Questions in Natural Language about Images using Deep Learning
27	Medical Image Classification using Machine Learning Techniques
28	Advanced Text Summarization
29	Reverse Image Search Optimization using Captioning
30	Semantic Tree
31	Autonomous Military Vehicle

32	Intelligent Form Reader
33	Real Time Communication System for Speech and Hearing Impaired
34	Adaptive Portfolio Manager
35	Automatic Database Schema Generator
36	(K.I.N.K.)Krackd Image Now Komplete
37	An Automated System for Skin Disease Diagnosis
38	Leaf Disease Detection
39	Personality Trait Predictor
40	Sleep Disorder Detection
41	Data Analysis and Visualization on Airline Data
42	Intelligent System for Weather and Congestion Probing
43	Mood Based Music Classification
