

Academic Year 2026-27

Transformation Circle

Aim and Focus: Transforming Indian to Transform India

Theme: I Transform and Nation Transforms (Individual transformation alone leads to Societal transformation)

The Transformation Circle is a student development club rooted in Indian traditional knowledge and practices that promotes personal growth, knowledge sharing, leadership, and overall personality development leading to individual transformation. It provides students with various opportunities to participate in activities beyond academics, develop professional and communication skills, and learn the art of managing themselves and working effectively with others, thereby strengthening their life skills and fostering personal transformation.

The club organises guest lectures, panel discussions, workshops, and interactive sessions that connect Indian traditional knowledge and values with contemporary life, exploring themes such as ethical financial practices, compassionate business practices, socially responsible entrepreneurship, value-based leadership, responsible use of technology, and personal development rooted in Indian culture and history. Students get an opportunity to train themselves and interact with industry leaders, professionals, and subject-matter experts, while also gaining experience in event planning, coordination, teamwork, and leadership. The Transformation Circle supports the holistic development of students by ensuring that everyone understands himself/herself better and also the world around him/her.

Vision

To nurture culturally rooted, value-driven, and socially responsible individuals through the harmonious integration of body, mind, and intellect, enabling personal transformation for societal good and national development.

Mission

- To connect students with Indian history, culture, traditional knowledge, and value-based ways of living, fostering self-discipline, ethical conduct, respect for diversity, and responsible citizenship.
- To promote holistic development through self-reflection, yoga, meditation, wellness practices, and interactive learning, helping students understand themselves and the world around them and explore their purpose in life.
- To provide opportunities for expert interaction, practical learning, and student-led initiatives that develop leadership, communication, teamwork, organisational, and professional skills, empowering students to contribute meaningfully to society and the transformation of India.
