

Congratulations

We are proud to share that DJS Antariksh, the official Martian Rover Team of our institute (DJSCE), has once again raised the bar at the European Rover Challenge Onsite 2025, organized by the European Space Foundation in collaboration with the European Space Agency (ESA) and leading international space and robotics organizations.

The team began its journey with tremendous momentum, as over 100+ teams registered worldwide for the challenge. DJS Antariksh emerged as the **1st worldwide** in the qualification round, showcasing outstanding technical excellence and innovation. Building on that success, the team advanced to the onsite finals in Krakow, Poland, where they competed against the best student teams from across the globe and proudly achieved **1st place in Aisa, 1st in India** and **7th place worldwide** with a **remarkable score of 1743.5**.

This achievement reflects the team's relentless dedication, engineering brilliance, and collaborative spirit, bringing pride not only to the institute, but also to **our country** on the global stage.

Hearty congratulations to all the student team members and the faculty mentors.

Best wishes!

Dr. Hari Vasudevan
(Principal)
