Accordingly, pedagogy is focusing more on internships and field exposure. The institute is strengthening partnerships with leading universities like the University of Michigan, Ann Arbor, and five top European institutions—Central-eSupélec, TU Dresden, the University of Groningen, KU Leuven and TU Ilmenau.

An ongoing revamp is in the Practice School internship model: two months for second-year students and six months for fourth-year students. More credits are being assigned to work experience. Almost 35 per cent of undergraduates at BITS Pilani get job offers during pre-placement, a metric many institutes are grappling with. “In a difficult job market, the students who will do well are not those who know one tool or one programming language. They are the ones who can learn fast, think clearly, communicate well, work with others and solve problems that matter. That is the kind of graduate BITS Pilani must produce,” says Rao. ■
